Tasos Lazarou

Software Engineer

I'm a passionate and versatile Software Engineer with a demonstrated history of working in the information technology and services industry. I've a strong foundation in both frontend and backend technologies. I have experience building dynamic, user-friendly web applications using HTML, CSS, JavaScript, and frameworks like Vue.js. On the back-end, I work with technologies such as Node.js, Python and C++. I'm always eager to learn new technologies and improve my skills to create seamless, efficient solutions. My goal is to deliver high-quality code, work collaboratively with teams, and build intuitive experiences that drive user engagement.
